

Choice Guide - Tables		
	Material (Composition)	Common Applications
Lightweight Plastic Folding Tables		
Classic Series™	Thermo-formed ABS plastic top and bottom sheets enclosing 3/4" plywood frame	Classic Series™ Lightweight Plastic tables deliver an upscale look in multi-purpose spaces where tables are moved frequently and uncovered.
PolyLite®	Blow-molded Polypropylene plastic top supported with under-side steel frame	PolyLite® tables offer an economical but still durable and attractive alternative in multi-purpose spaces where tables are moved frequently and uncovered.
PolyBrite®	Blow-molded Polypropylene plastic top supported with under-side steel frame	PolyBrite® tables are made for kids' spaces. Tables are offered only in bright primary colors (blue, red, yellow) and ordinarily with adjustable height folding legs.
High Pressure Laminate Folding Tables		
Classic Series™	3/4" plywood with high-pressure laminate surface and phenolic backer sheet	Classic Series™ Laminate folding tables are the preferred choice in schools, offices and other environments where a hard writing surface is desired. The range of available laminate surfaces also offers great versatility for matching décor.
600L Series	3/4" plywood with high-pressure laminate surface and phenolic backer sheet	600 Series Laminate folding tables offer a different look with the benefits of a high pressure laminate surface. This model features 90 degree corners (versus standard rounded) and folding legs with 1.5" diameter square tubing.
Conference Series	3/4" plywood with high-pressure laminate surface and phenolic backer sheet	Conference Series Laminate folding tables are the preferred choice in seminar settings. Folding legs are recessed to one-side increasing the available seating space. The range of available laminate surfaces also offers great versatility for matching décor.
Plywood Banquet Folding Tables		
200 Series	5/8" clear face plywood with top coat of UV light-cured polyurethane	PS Event Furniture's 200 Series plywood banquet tables are the first of banquet settings where tables are covered. 200 Series come in every conceivable table shape and are built to last in the most demanding use situations.
600 Series	5/8" clear face plywood with top coat of UV light-cured polyurethane	PS Event Furniture's 600 Series plywood banquet tables are the standard choice of luxury hotels for banquet or seminar environments requiring a table linen. This model features 90 degree corners (versus standard rounded) and folding legs with 1.5" diameter square tubing.
